

$K_r \equiv 0$ generic 2π

(3) $\bar{v}$ is the

$$f = (u, v^2, v^3)$$

$$ds^2 = du^2 + v^2(4 + 9v^2) dv^2$$

$f, \bar{f}$: generic 2π frontal, 等長の

(1) f is CE $\iff \bar{f}$ is CE

(2) SW CLR

(3) (2,5)-CE

(4) (3,4)-CE
 $\subset S_K^\pm$

(2,5)-CE
 (3,4)-CE
 $\subset S_K^\pm$

($K \geq 2$)

$m=2,3$

$$K = \frac{0}{v^m} + \frac{0}{v^{m+1}} + \dots + \frac{0}{v} + \square + \Delta v + \dots$$

$m=2, \dots, \infty$

$\circ f$: m -type edge $\iff ds_f^2: \mathbb{R}^{2(m-1)}$
 第一種
 $\implies f, \check{f}, f_*, \check{f}_* \neq m$ -type edge
 $\circ$ Ex. $f \sim \check{f}, f_*, \check{f}_*$ is not true.
 $\circ$ Thm III, IV (m -type $\#$ $\mathbb{R}$) $\circ$ C, ds_f^2 is symmetric $\iff f \sim \check{f}, f_*, \check{f}_*$
